The screenshot shows the Docker Desktop application interface. The left sidebar contains navigation options: Containers, Images, Volumes, Dev Environments (marked BETA), Extensions (marked BETA), and Add Extensions. The main panel is titled 'Images on disk' and shows a summary: 'Last refresh: 8 minutes ago', '2 Images', '13.26 KB total size', and '13.26 KB / 13.26 KB in use'. Below this, there's a section for 'Images' with a 'Give Feedback' link. The 'LOCAL' tab is selected, showing a table of images. The table has columns for NAME, TAG, IMAGE ID, CREATED, and SIZE. Two images are listed: 'hello-world' and 'icr.io/0034ns/helloworld', both with the 'latest' tag and an image ID of 'feb5d9fea6a5'. Both images are marked as 'IN USE'. At the bottom, there's a 'Connect to Remote Content' section with three checkmarks: 'Store and backup your images remotely', 'Unlock vulnerability scanning for greater security', and 'Collaborate with your team'. A 'Sign in' button is present. The status bar at the bottom shows 'RAM 1.76GB', 'CPU 0.06%', and 'Not connected to Hub'.
